

FROM FARMING to industry might be the title of the above photo which shows a compos-

ite view of the Ted Cornell property at highway 190 and South Main street, where

Beckman Instruments Inc. will locate a new plant. The photo is taken from the 190

overpass, looking south; the Beckman plant is now planned for the east side of the prop-

erty, about opposite Porterville college. (Farm Tribune photos)

## THIS IS BECKMAN STORY: GROWTH FROM SMALL FIRM TO INTERNATIONAL STATUS

Beckman Instruments, Inc., of Fullerton, California, is a major manufacturer of electronic instrumentation for scientific, medical, industrial and space-defense applications.

Now employing more than 5,500 persons, the company manufactures a broad variety of products for precision measurement, analysis and control functions. Beckman, with seven operating divisions, has plants in California, Illinois, New Jersey, Canada, Germany, Scotland, Switzerland and Japan, and marketing networks throughout the U.S. and 70 other nations.

The Beckman story began in 1935 when Dr. Arnold O. Beckman, founder and president, then a chemistry professor at California Institute of Technology, built a simple analytical instrument for a friend in the citrus processing industry.

The instrument, a pH meter, was designed to measure the acid-

ity of lemon juice. However, the instrument proved a marvel of versatility and soon was being used to measure the acidity or alkalinity of virtually any solution.

In 1940, five years after it began operations, the company recorded sales of \$168,000. In the fiscal year ended June 30, 1963, Beckman sales totaled \$78.7 million.

The Beckman organization, world-wide in scope, has grown rapidly as the result of product development within the company and acquisition of other organizations engaged in related phases of instrumentation.

Headquarters of the company are at Fullerton, California, and four of its divisions are located

## Bushfaces, Dolls! UP And At 'Em Again! Dodge City Is Expecting Us On July 9

Office of the Mayor

**D** DODGE CITY, KANSAS  
**C** June 15, 1964  
FRANK MAPEL  
MAYOR

Honorable Bill Rogers  
Mayor of Porterville  
Porterville, California

Dear Mayor Rogers:

As Mayor of the City of Dodge City, I am happy to announce that I am proclaiming July 9, 1964, as "Porterville Day on Boot Hill".

We feel honored that the Studio Band has selected Dodge City as one of the cities in which to present their entertainment.

I am looking forward to meeting you and hearing the "fabulous studio band" of Porterville, present its concert on Boot Hill in Dodge City, Kansas. I am sure you will enjoy your visit to Dodge City.

Sincerely yours,

*Frank B. Mapel*  
Frank B. Mapel  
Mayor

Porterville High School Band  
735 West Olive Street  
Porterville, California

FBM/blg

SHADES OF the Centennial. They're expecting us in the famous Kansas frontier town of Dodge City on July 9. Buck Shaffer and the Fabulous Studio band are booked for a concert on Boot Hill; there'll be some special doin's in the Longbranch; the Dodge City chamber of commerce along

with Dodge City Mayor Frank Mapel, have a welcome ready; and Buck, before he left on his trans-continent tour, said "get that Centennial bunch going again, let's show Dodge City what the real west is like." If interested, check with the Porterville chamber of commerce.

Vol. XVIII, No. 2

PUBLISHED WEEKLY — PORTERVILLE, CALIFORNIA

Thurs, June 25, 1964

### DR. BECKMAN BIOGRAPHY

Dr. Arnold O. Beckman, president of Beckman Instruments, Inc., an international manufacturer of electronic instrumentation, has gained distinction as a scientist, educator and business leader.

Dr. Beckman founded the company in 1935 with the development of the first Beckman instrument, a pH meter for measuring acidity and alkalinity. In 1940, he developed the helical potentiometer, a precision component, and the quartz spectrophotometer, a key instrument for chemical analysis. There are now more than 400 Beckman products, generally classified as instruments, systems and components, with applications in science, industry, medicine, space-defense, agriculture and many other technologies.

A native of Cullom, Illinois, Dr. Beckman was graduated from the University of Illinois with a bachelor's degree in chemical engineering and a master's degree in physical chemistry. He received his doctorate in photo-chemistry at the California Institute of Technology and served on the chemistry faculty there from 1928 through 1940, at which time he left the teaching profession to devote full time to the development and manufacture of scientific instruments.

Dr. Beckman has retained an active interest in education. The first alumnus named to Caltech's Board of Trustees, he was elected Board Chairman in 1964. He also serves as a regional trustee of Mills College and a member of the lay Advisory Board on Orange State College, Fullerton, California.

In June, 1960, Dr. Beckman received an Illini Achievement Award from the University of Illinois for "leadership in the field of precision instruments." A citation accompanying the award

### FACTS ABOUT BECKMAN, INC.

Beckman Instruments, Inc. has its headquarters at Fullerton; the company employs 5,700 persons, world-wide; its products are electronic instruments, systems and components; its principal markets are in science, medicine, industry, aerospace, and defense.

For the fiscal year that ended June 30, 1963, sales totaled \$78,737,738; net earnings were \$3,734,301; per share, \$2.40; common shares, 1,558,435.

The company has major facilities at Fullerton, Palo Alto, Richmond, Chicago, and La Jolla. Foreign subsidiaries are located at Geneva, Switzerland; Munich, Germany; Glenrothes, Scotland; Tokyo, Japan; and Capetown, South Africa.

PRESIDENT OF Beckman Instruments Inc., Dr. Arnold O. Beckman, whose company announced June 19 that an electronics plant will be lo-

cated in Porterville, initially employing from 200 to 300 persons, and ultimately, possibly 500.

## STORY ON BECKMAN MOVE TO PORTERVILLE STARTED QUIETLY BACK IN 1960

PORTERVILLE, June 25 — With announcement last Friday that Beckman Instruments, Inc. will construct a plant in Porterville, a story that started back in 1960 reached its climax. Chronological highlights of that story, from the Porterville viewpoint, follow:

Mid-1960: Allan Coates, manager of the Porterville chamber of commerce, heard that Beckman Instruments had secured a wage survey of Tulare county, including the Porterville area.

As a shot in the dark, Coates sent a package of information about Porterville to the Beckman company in Fullerton; later he visited the Beckman office in Fullerton.

January, 1961: In a communication from Donald A. Strauss, a vice president of Beckman, it was stated that the company's plans for a new plant were "still flexible", but that when the company was ready to make a decision, "Porterville will be among the desirable alternates."

And in 1961, Coates again visited the Beckman facilities in Fullerton, attracting a certain amount

## Walter J. Misko Will Manage New Beckman Plant

FULLERTON, June 25 — Walter J. Misko, who has been with the Beckman organization since 1957, will be the manager of the new Beckman Instruments, Inc. operation in Porterville. His most recent assignment has been manager of corporate industrial engineering at the company's Fullerton headquarters plant.

Prior to joining Beckman, Misko spent seven years with the Ford

(Continued On Page 4)

## BECKMAN "GOES TO WORK" FOLLOWING ANNOUNCEMENT OF PORTERVILLE MOVE

PORTERVILLE, June 25 — Officials of Beckman Instruments, Inc. have "gone to work", since announcement, Friday that a new plant will be constructed in Porterville.

George J. Renne, vice president for finance, was in town Monday to check temporary facilities as well as the permanent site; attorneys for individuals involved in the Beckman transaction, as well as City Attorney Jack Quirk, have

been in communication with Beckman attorneys to iron out legal details.

Announcement of the Beckman move was made by Earl C. Janson, Beckman vice president for manufacturing, who said operations are expected to begin in September in temporary facilities with an initial pilot group of about 20 persons.

Janson said the Porterville sup-

(Continued On Page 8)

## Editorial Comment

### WELCOME BECKMAN INSTRUMENTS

To Beckman Instruments, Inc., we say, "Welcome."

To the Industrial committee of the Porterville chamber of commerce, and to Allan Coates, chamber manager, we say, "Congratulations."

To the oracles of the coffee counter who offer bad advice along with their adverse comment about the efforts of the community to interest industry, but who contribute no money and no work, we say, "Hah."

As we have stated often, the work of the chamber of commerce, and of city officials in the field of so-called industrial promotion, is a thankless job; there can be little if any publicity on specifically what is happening because industrial firms want no publicity until a final decision is made; there are many disappointments because the bringing together of a specific industry and a specific community involves many things, not the least of which is the offer of enticing "deals" by some communities.

So it's a case of work, work, work by a few individuals, a case of constantly updating necessary information about the community, a case of trying to make available the things a specific industry needs, and a case of a specific community being favorably located and possessing the economic attributes that a specific industry wants.

All the factors involved worked out with the Beckman company, not just by chance, but because of background effort by the chamber industrial committee, by city administration people, and by representatives of Beckman.

So the community and Beckman Instruments are entering into a mutual arrangement and a mutual friendship. Total relationship will be profitable and advantageous for both parties concerned.

Welcome, Beckman. Congratulations, Porterville chamber of commerce.

there. The Scientific and Process Instruments Division, of Fullerton, whose initial product was the pH meter, manufactures analytical instrumentation for scientific laboratories, medical research and industrial process analysis and control. These instruments provide rapid, accurate measurements in virtually any application involving the use of chemicals.

The Helipot Division, of Fullerton, concentrates on the development and production of precision potentiometers, servo-motors, Hall Effect products and related components for electronic instruments and systems.

The Systems Division, of Fullerton, specializes in the design and manufacture of high-speed electronic data processing and acquisition equipment, ground telemetry systems, and precision systems components for use in major industrial, defense and space age programs. The division was formed in 1957 by consolidating systems development groups within the company.

The Special Projects Division, of Fullerton, is assigned to the development of new products in areas not covered by existing divisions. Formed in 1960, the division manufactures the Mark series atmosphere analyzer which is used to monitor the closed atmospheres

LLOYD STEARMAN, pioneer aircraft designer and now a consultant to Lockheed Aircraft, was guest of honor at 17th annual flyin at the Porterville municipal airport over the past weekend. Stearman, while in Porterville, had dinner with an old friend, Lester Lamkin, and enjoyed a bus tour through the Tule river country as a guest of the Sierra Success association. He is shown above with two former Miss Tulare Countys, Barbara Calkins and Carla Cloer, who assisted in the Sierra Success association booth at the flyin, and also were hostesses on the mountain trip. Plane in background is a Stearman, now modified for agricultural work.

of all submarines of the U.S. nuclear fleet.

The Spenco Division, of Palo Alto, Calif., develops and manufactures biochemical and medical instrumentation and systems for research laboratories and clinical analysis. Among its products are a giant ultracentrifuge used to help isolate the first pure polio virus, ultramicro analytical systems that permit routine blood analyses with drop-sized samples, electrophoresis equipment, oxygen electrodes, infrared gas analyzers and other instruments for research laboratories, hospitals and clinics. The division became a part of Beckman in 1954 with the acquisition of the Specialized Instruments Corp., of Belmont, Calif.

The Berkeley Division, of Richmond, Calif., was established in 1952 with the acquisition of the Berkeley Scientific Co., of Richmond. The division designs and builds high-speed electronic test, counting and timing instruments and analog computers. The instruments, which measure up to 12 billion events in a single second, are used in industrial and space-defense applications, and the analog computers, which electronically simulate a system under design, enable engineers to "test" a product before it is off the drawing board.

The Offner Division, of Schiller Park, Ill., a Chicago suburb, became a part of Beckman in 1961 with the acquisition of Offner Electronics, Inc., manufacturer of industrial, medical and space instrumentation. Among the division's principal products are direct-writing oscillographs, electroencephalographs and direct-current amplifiers.

Among other Beckman facilities are regional offices at Chicago, Houston and Mountainside, N. J., and a manufacturing and sales facility at Toronto, Canada.

In May, 1963, Beckman acquired Sharp Laboratories, Inc., of La Jolla, Calif., marking the company's entry into the nuclear instrumentation field. Sharp Laboratories produces high-sensitivity radiation measuring instruments and carbon dating laboratories.

In 1953, Beckman went overseas to establish a subsidiary, Beckman Instruments, G.m.b.H., in Munich, Germany. The German unit, first to be established by a U.S. company in post-war Bavaria, was formed to give Beckman a competitive foothold in the European market. The 66,000-square-foot Munich plant, which produces a growing line of equipment developed by domestic division, now has about 600 employees.

In 1958, the company opened a plant at Glenrothes, Scotland, to house Beckman Instruments, Ltd. The Scottish operation, beginning with the production of precision potentiometers developed by the

Helipot Division, was established to supply precision components to the United Kingdom and the sterling areas, plus other parts of the world. The plant now manufactures other Beckman products developed in the United States.

Beckman Instruments, International, S.A., established in 1960 at Geneva, Switzerland, directs the company's overseas manufacturing and marketing operations abroad, including dealer and direct marketing operations in some 70 countries. In August, 1963, Beckman established direct marketing operations in France and the Republic of South Africa. The marketing organization in France is headquartered in Paris and was formed through the acquisition of Promesur, formerly the exclusive Beckman dealer in that country. The sales subsidiary Beckman Instruments (Pty.) Ltd., Capetown, directs marketing operations in South Africa.

Early in 1962, the company extended its operations to Japan with the establishment of Beckman-Toshiba, Ltd., a joint-venture firm which is assigned to the manufacture and distribution of Beckman products in the growing Japanese market. Beckman's partner in the enterprise is Tokyo Shibaura Electric Co., one of Japan's largest and most respected industrial organizations.

Throughout its history, Beckman Instruments has placed heavy emphasis on research and development, and is noted as a pioneer of new technologies and markets.

In addition to those previously mentioned, other Beckman products are:

**Amino Acid Analyzer:** a medical research instrument which automates the previously complex and tedious process of isolating and analyzing amino acids.

**Gas Chromatograph:** an instrument which literally takes apart chemical substances as elusive as flavors and aromas and delivers the components in ultrapure form. Its applications include flavor engineering, medical research, establishment of new standards of chemical purity.

**Infrared and ultraviolet spectrophotometers:** instruments which identify and measure the components of complex chemical mixtures. They are used in research, medicine, agriculture, industrial process control, air pollution monitoring, anywhere that chemicals are present.

**Oxygen electrode:** an instrument which for the first time, permits the measurement of oxygen directly in the body. It is useful as a research tool and as a surgical safety monitor.

Indications are that deciduous fruits and nut production this season in California will run average or better in volume.

## STORY ON

(Continued From Page 1)

Industrial committee sent new information about the community to Beckman.

July, 1962: Coates personally met Strauss, learning later that he had lived in Porterville for a year, back in 1940, so knew something about the community.

In December, 1962, Walter J. Misko, an industrial engineer with Beckman, came to Porterville to "look over the community." (Misko is now scheduled to be plant manager in Porterville.)

Early 1963: The Porterville chamber of commerce answered a request from Beckman concerning amount of taxes that would be paid on a hypothetical plant in Porterville.

In May of 1963, Coates, representatives of the industrial committee of the Porterville chamber, and city officials met with Misko

for a general discussion. No commitments were made, but the Porterville group felt that at least the community was not forgotten. But nothing further was heard for about a year.

Early June, 1964: The local "grapevine" picked up word that representatives of Beckman were in town. Coates telephoned Earl C. Janson, Beckman vice president for manufacturing. Janson said that the company was looking at three communities, one of them Porterville.

June 8, 1964: Janson phoned Coates and said that Misko would be in town at 9:30 a.m., June 10.

June 10, 1964: Misko arrived with three pages of questions for which he needed answers immediately. The questions covered virtually every phase of the community. He said that a presentation to officials of Beckman by a Porterville group was requested on June 16, and that a decision would be made the following day.

June 10-15: Coates rushed out industrial files of the chamber of commerce; Mayor Bill Rodgers instructed City Manager Roy Pederson to update plans developed in 1959 to serve industrial property south of Porterville; (at that time another industry appeared to be interested in this property). Norman Polly, chairman of the chamber industrial committee, and Ted Cornell, owner of the property, were called in; Albert Konda was contacted relative to renting his building at Main and Olive as a temporary plant site; owners of other vacant buildings were contacted; Don Howard, president of the chamber of commerce and high school principal, contacted the school administration and board members relative to immediately setting up classes to train personnel for Beckman; the city council met to OK plans to serve the industrial site with sewage disposal and water; (at regular fees) a brochure of requested information was put together.

June 15: Misko returned to Porterville to check out the brochure and to be sure that all requested information was available.

June 16: Meeting with Beckman officials and attorneys in

TRIBUNE CAMERA saw this activity, — over the weekend at the Porterville Municipal airport as 250 planes were registered in at 17th annual Moonlight Flight and Fly-In sponsored by the Porterville Area Pilots' association. From top: New and not so new planes; concession booths; a "Stow Away", to get from the airplane to someplace after you land; 20-And's in their booth; exhibit by the Sierra Success association promoting the Tule River country; and workers in the Post 20, American Legion and Auxiliary booth.

(Farm Tribune photos)

Fullerton were Pederson, Coates, Howard and Cornell. The group returned late that night.

June 17: At 4:45 p.m., Coates received a telephone call stating that directors of Beckman Instruments, Inc. had decided to come to Porterville.

June 19: The news was given to the press at 10 a.m. meeting in the chamber of commerce office, with a 3 p.m. release date.

From June 10 to 17, Coates, who had quit smoking, consumed three packs of cigarettes a day. Immediately after the phone call from Beckman on June 17, he quit smoking again.

So from mid-1960 until June of 1964, the Beckman Instrument, Inc. move to Porterville was in the making. As is the case with all industrial negotiations, there was no publicity because industry wants it that way.

## Early Harvest

● Along with big yields, you want an earlier, easier harvest. And that's just what DeKalb Sorghum Breeders had in mind. That's part of the "why" of DeKalb's big, open head. That's why DeKalb Hybrids were selected to produce dry, ripe grain on green stalks. Multiply early harvest by other bred-in DeKalb extras: fast growth and disease resistance; open heads and stiff stalks; big, quality grain yields and easy combining, and you see why it pays to plant ALL DEKALB.

If you would like to give your garden that Japanese touch without going to Japan or importing a gardener, we have the stuff to do it. This stuff includes such things as Pines, Nandina, Magnolia Soulangeana, and some ornamental junipers.

Among the pines are Mugho and Japanese black pine. Mugho is especially dwarf, rarely growing over four or five feet. The black grows taller and faster but can be pruned to stay at most any height. A good tree for an entry way or planter box.

Nandina, which is also called Japanese heavenly bamboo, is a pretty plant in any garden. The leaves give fall colors, the plant sets berries, and it's easy to grow in full sun or part shade.

The Magnolia is a small flowering tree with beautiful saucer-like blooms. You'll like the way it grows, the large, green leaves, the interesting shape. Almost as good an addition as a feminine Japanese gardener. Along with these are conifers for bonsai use and some good ideas for gardening in general. Come see us soon.

### New Law On Rear-View Mirrors When Towing Trailer

VISALIA, June 25 — The legal requirement for adequate mirrors on both sides of an automobile towing a trailer that obscures the driver's view to the rear is being violated much too often in the opinion of Captain B. R. Smith, commander of the California Highway Patrol's Visalia area. "The vehicle code was amended last year to provide for dual mirrors to enable the driver to see at least 200 feet to the rear."

"Many of the violators are persons who have rented a trailer for a short time from an establishment that is not aware of the new requirement. Most rental agencies, however, have mirrors available to attach to the renter's vehicle."

"Nevertheless, it is the driver's responsibility to see that his car is properly equipped and legally operated," Capt. Smith says.

### Wall's Livestock Has New Line For Beef Cattle

PORTERVILLE, June 25—Wall's Livestock Supply has been appointed local distributor for a new line of health products for beef cattle, being introduced by Elanco Products company, a division of Eli Lilly and company of Indianapolis.

Two forms of Tylan, the antibiotic discovered and developed specifically for agricultural use by Lilly scientists, are included in the line. They are Tylan 200 for injection, a ready-to-use injectable that is particularly effective against shipping fever, pneumonia, and foot rot; and Tylan Boluses for the treatment of intrauterine infections that may develop after calving.

Other products include Elbolus-C.D. for treating of calf scours; El-Ade, for the prevention and treatment of vitamin deficiencies; and Merthiolate aerosol, for the treatment of cuts, scratches, and abrasions.

Elanco Products company originally entered the agricultural market with Stilbosol, a feed additive used to stimulate gains and improve feed efficiency of cattle and sheep.

### WATCH FOR FIRE ANT MOUNDS

VISALIA, June 25 — A request that farmers and stockmen watch for large ant mounds in open pastures or on rangeland that might reveal the presence of imported fire ants, has been issued by Agricultural Commissioner Elvin O. Mankins. These ants bite and sting and can become a serious menace. There are no known infestations in Tulare county at present, but any indication of the ants should be reported immediately to Mankins' office.

## WALL-TO-WALL CARPETING EASY TO DRY- CLEAN WITH NEW DO-IT-YOURSELF METHOD

Mr. and Mrs. Leonard (Dutch) Widman

## GET THE FACTS FROM THE WIDMANS AT WESTERN FLOOR COVERING

HOST ELECTRIC UP-BRUSH and HOST DRY-CLEANER are the key to this fabulous new carpet-cleaning process . . . And anyone who can operate a vacuum cleaner can now dry-clean wall-to-wall carpeting — easily and without dust.

HOST cleans without water. Carpets are dry and ready to

walk on immediately . . . No danger of rust marks or of shrinkage . . . And HOST works on all fibers — wool, nylon, cotton, acrylic, rayon, etc.

It will mean money in your pocket to check with the Widmans at Western Floor Covering Company on this unique new appliance and dry-cleaning material.

## CHAPEL CHIMES

By  
**Rev. N. J.  
Thompson**

**WILL DURANT**, noted New  
English philosopher and writer,  
once said: "Let us publicly make  
known that we resent corruption  
in politics, dishonesty in business,  
faithlessness in marriage, pornog-  
raphy in literature, coarseness in  
language, chaos in music, and lack  
of meaning in art."

What does God want us to do  
today? He wants us to take a  
definite stand against evil, error,  
and corruption. J. Edgar Hoover,  
Director of the FBI, said, "The  
task for us is spiritual rededica-  
tion — the creation of a world of  
love, justice, and truth. This is  
the Christian ethic which is part  
of our heritage."

An atheistic soap manufacturer  
sneered at the ministry of an  
evangelist. He said, "You are cer-  
tainly wasting your time preach-  
ing the Gospel. Look over this  
city and you'll see the Gospel  
hasn't done much good, for there  
are thousands of thieves, crooks,  
liars, and blasphemers."

The evangelist was silent for a  
moment. Then he pointed to a  
little boy making mud pies in the  
gutter. The boy's hands, face, and  
clothing were plastered with dirt.  
The evangelist said, "I see soap  
hasn't done much good in this  
city, either. There are still some  
very dirty people."

"Soap is only useful when it is  
applied," pointed out the soap  
manufacturer.

"Exactly," replied the evangeli-  
st. "So it is with the Gospel."

Let's take time to apply the Gos-  
pel to our hearts and lives. True,  
attitudes, customs, and morals are  
changing. We are bewildered by  
the population explosion, automa-  
tion, atomic energy, existentialism,  
and the Communist octopus. We  
need not be confused. Right is

**AWARD WINNERS** at the week-  
end Fly-In sponsored by the  
Porterville Area Pilots asso-  
ciation are shown above dur-  
ing presentations. From left:  
Bill Pukmel, master of cer-  
emonies; Chuck Murphy, rep-  
resenting the Flying Cow-  
boys of Lompoc who had the  
largest group in Porterville;  
Ray Flanagan, 65, of Red  
Top, oldest pilot; Jon Beeker,  
16, of North Hollywood, young-  
est pilot; Ray Woodmansee,  
president of the pilot's asso-  
ciation who accepted an award  
for Pete Revere, of Inglewood,  
for the best antique plane, a  
Waco UPF-1941; B. E. Moran,  
of Los Angeles, best experi-  
mental aircraft, a Lincoln  
Page; and Porterville Mayor  
Bill Rodgers, who made the  
presentations. Virgil Gibson,  
of Dayton, Ohio, not in photo,  
received a trophy for coming  
the longest distance. Regis-

tering at the Fly-In were 250  
planes. (Farm Tribune photo)

still right. God's truth is change-  
less, eternal. The Sermon on the  
Mount is still the noblest words  
ever spoken.

## HAMILTON, MRS. RENOUF, ARE COMMENDED

**VISALIA**, June 25—The Tulare  
County Citizens' Welfare Advisory  
committee, at a dinner meeting in  
Visalia, commended three of its  
members whose terms of service on  
the Committee terminate June 30.

Lester J. Hamilton of Porter-  
ville, chairman of the committee;  
Mrs. Juliet Renouf of Porterville,  
the committee secretary; and How-  
ard Weekly of Ivanhoe, the legis-  
lative representative of the com-  
mittee.

The Advisory group praised its  
three members who were attend-  
ing the committee meeting in  
their official capacity for the last  
time and thanked them for long  
and dedicated service to the cause  
of good welfare programs in Cali-  
fornia.

The advisory group is preparing  
a summary of its activities to date  
to be presented to the board of  
supervisors.

OFF THEY went last Friday morning - the Fabulous Studio band - on a trans-continent tour that will take them to the New York World's fair for

engagements on July 1 and 2; to Washington D.C., for bookings at State Department events and at the National Press club, and to about 25 military bases across the country. The band will play a special show on Dodge City's famous Boot Hill July 9, an event to which a contingent of Porterville citizens is making plans to attend. In the group, as the band left Porterville shortly after sunrise, are, from left: Standing Art Huff, of the high school music department who will help supervise the group and appear as tenor soloist; Larry Lindgren, Jack Lutz, Eddie Hunt, Jack Smith, Kenny Sinner, Jerry Street, Kenny Dumont, Tim Behrens, Gary Landers, Bob Schepmann, Duane Bond, Walter Groshong, and Director Buck Shaffer; kneeling - Mike Ringsdorf, Bobby Lincoln, Richard Simpson, Bill Ingram, Larry Todd, Randy Knight, Mack Jenkins, Bob Hurlbut and Robert Powers. The band will return to Porterville on July 13.

## DR. BECKMAN

(Continued From Page 1)

noted his career as a "distinguished scientist whose vision has aided in the creation of new instruments for equipping the laboratories of a rapidly changing technological age."

Dr. Beckman was one of the founders of the Instrument Society of America, a national professional association, and was president of ISA in 1952. In 1959, he was made an honorary life member of the organization for his "contributions to instrument technology, science and education."

He is a member of the American Chemical Society, the American Association for the Advancement of Science, and other technical and professional societies. In 1957, the American Institute of Chemists awarded him an honorary life membership for his contributions to technology.

In civic affairs, Dr. Beckman presently serves as technical consultant to the Orange County Air Pollution Control District. He has played an active role in Southern California's campaign against smog.

He is a member of the Advisory Board of the Orange County Health and Welfare Council. He also is a director of the Southern California Symphony Association, a trustee of the California Museum Foundation, and vice chairman of the Advisory Committee for the Foundation's planned Space Age Museum in Los Angeles.

In addition to his duties as president of Beckman Instruments, Dr. Beckman is a director of the Security First National Bank, the Southern California Edison Co. and Continental Airlines, Inc., and is a trustee of the System Development Corp. At SDC, he is chairman of the Executive Committee and vice chairman of the Board of Trustees.

He is a second vice president and a member of the Board of Directors of the California State Chamber of Commerce, and a director of Stanford Research Institute. He served as president of the Los Angeles Chamber of Commerce in 1956.

Dr. and Mrs. Beckman reside in Corona del Mar, California. They have two children, Patricia and Arnold S. Beckman. Dr. Beckman's hobbies include sailing, photography and music.

## BECKMAN "GOES

(Continued From Page 1)

port operation will supply sub-assemblies for expanding requirements at Beckman plants in northern and southern California. He said Porterville was selected for the new facility because of its mid-state location and the availability of personnel to staff the new unit.

"We appreciate the cooperation and support Porterville has given us in locating a manufacturing operation there," Janson said. "We look forward to becoming a productive member of the community."

As things now shape up, temporary facilities will be set up in the Konda building, Main and Olive; training classes will be started early in July at Porterville college for future Beckman employees, with Beckman providing an instructor to work with a college instructor, and also necessary equipment; final sale arrangements are being completed between Ted Cornell, property owner, and Beckman with an option on about 15 acres, plus another option on some 80 acres, at highway 190 and South Main street.

As planned now, the initial plant will cover 43,200 square feet, with construction to start this fall and with operation slated to begin by July of 1965; eventually the plant may be expanded to 176,000 square feet.

With opening of the plant, from 200 to 300 persons are expected to be on the payroll; this number may, over the years, expand to 500 persons.
